## Installing for Windows 95 98 2000 NT XP

1. Start **WINDOWS**.
2. Choose RUN from **START** menu.
3. In the Run dialog , click the **Browse** button to open the Browse dialog box.
4. In the Browse dialog box, select the CD-Drive in which the Installation CD is kept.
5. Choose **SETUP.EXE** from the directory.
6. You will be introduced to the startup screen. When the startup screen disappears, window is displayed as shown.
7. This window will be followed by the information window, where you will be asked to give your personal info like Name, Company Name and the CD Serial Number which is written on your CD ROM or behind DVD Box.
8. You can specify a directory name in which you wish to install Akruti or simply press Next to install in the default directory **C:\Akruti** .
9. This Dialog box will confirm the Hard Disk Space available and space needed by **Akruti** and report in case the available space is less than required you need to make some additional space. Tick the box.
10. **"Create Icon on the Desktop"** if you want to create a shortcut and place it on the Desktop.
11. Then click on the next button after this actual installation begins.
12. During this phase, the files necessary for **Akruti** software are copied into the specified directory.
13. This Dialog box shows you the progress of the installation.
14. This is final stage of installation of **Akruti**.
15. After the installation it will ask you to restart the PC, simply say ok.
16. After rebooting the PC, you will find Akruti Engine on your desktop or go to start menu, select programs you will find AKRUTI menu, simply move your cursor on AKRUTI menu and select AKRUTI60 to load AKRUTI ENGINE.

## How to Register your Akruti

1. After loading the AKRUTI ENGINE you will find like below shown screen on your desktop. To get

CD Serial No : 2100-0756-3225-0001

Product ID : 9322-8799-7426-0431

Registration ID :

- Registration Number you should pass your CD Serial No. & Product ID to us.
2. Without Registration you can use AKRUTI for 15 days. For that simply click on Register Later button, automatically Akruti Engine will displayed on your desktop.
  3. CD-serial, was given by you when you installed the software.
  4. Product ID, is generated by Akruti according to your machine. It will be different for each and every computer.
  5. Based on CD serial number and Product ID. We re generating Registration ID (this is also sixteen digit number, each four digit number separated by a hyphen). You have to communicate the Product ID and CD serial number to us, to register the product. On receipt of this information we will provide the Registration ID. The given Registration ID will work only on that particular PC. For additional PCs, extra licenses will have to be purchased. You can use **AKRUTI ENGINE** 3 times per day. Before registering, you can use akruti product for first 15 days with out any message. Next three days it will work as a trial product. In trial period "**product in trial**" will be displayed every minute.
  6. You can use **AKRUTI ENGINE** 3 times per day.

**Note:** *If you change the system date backward or forward the trial period will be over.*

## Akruti Keyboard

**Phonetic Layout** Halant f key. Nukta ] key.

**DoE Inscript Layout** Halant d key. Nukta ] key.

**Typewriter Layout** Halant l key or **shift + \ key**. Nukta' key (the key to the left of 1.)

1. Typing by using the Akruti English Phonetic method is very simple characters are typed the way it is spoken. For combining characters, type the first character followed by halant and then follow it by the second character. Example *kra* is typed as **ka + halant + ra**. Similarly *shtra* is typed as **Sha + halant + Ta + Halant + ra**. Halnt is available on "F" key. Read the Typing Sequence section in the Reference manual for details.
2. You may experience that some conjuncts do not appear as they should if you are using programs like CorelDraw 10, MS Excel, Ventura etc. Change the mode from Generic from the Application menu. Then change the application type depending on the software you are using as given in the "**Application Menu**"

**Generic** For most of the Windows applications like PageMaker, MS Word etc.

**MS-Wordpad** WordPad, Power Point, Netscape and IE5.0

In most of the situations, you can keep the setting in Generic mode. This is the Default mode.
